

Catriel Pereira Torrez

Cochabamba, Bolivia • Email: catopereira72@gmail.com
GitHub: github.com/Catriel42 • LinkedIn: linkedin.com/in/catriel-pereira

Summary

Full-stack developer (.NET, Angular, TypeScript) and Software Engineering student building real-time, cloud-deployed apps on AWS. Leader of AWS AI User Group Bolivia. Seeking a junior full-stack role.

Experience

AWS AI User Group Bolivia

User Group Leader

Bolivia

2026 - Present

- Lead AWS AI User Group Bolivia, organizing community sessions on AWS and cloud topics and researching AWS AI services such as Amazon Bedrock AgentCore and Strands Agents SDK with .NET.
- Submitted speaker proposals to a conference on Bedrock + AgentCore with .NET.

Projects

BattleTanks

github.com/Catriel42/battle-tanks

Real-time multiplayer 2D tank game

- Built a real-time multiplayer game using .NET 10, SignalR, EF Core, PostgreSQL, and Angular 22, with Redis caching, database replication, and Docker containerization
- Provisioned AWS infrastructure with Terraform for automated deployment.

Events Manager Jala U

github.com/Catriel42/events-manager-jalau

Web app for free events at Jala University

- Developed a full-stack event platform for Jala University students using Angular, NestJS, and TypeScript, allowing users to discover, create, and manage university events.

Weather Dashboard

github.com/Catriel42/weather-dashboard

Real-time weather app, deployed on AWS

- Built with React 19, TypeScript and Vite on the OpenWeatherMap API, with city autocomplete, light/dark mode and a responsive layout, deployed on Amazon S3 and CloudFront (HTTPS, SPA routing) with infrastructure as code using AWS CDK; ESLint and Prettier for code quality.

Education

Jala University

Commercial Software Engineering with a Concentration in Design and Architecture

Cochabamba, Bolivia

2024 - Present

Technical Skills

Backend: C#, .NET, ASP.NET Core, EF Core, SignalR, NestJS, FastAPI, Spring Boot

Frontend: Angular, RxJs, React, TypeScript, HTML, CSS

Data and DevOps: PostgreSQL, Redis, Docker, Git, Linux

Cloud and IaC: AWS (S3, EC2, CloudFront, Bedrock), AWS CDK, Terraform

Practices: Clean Architecture, Domain-Driven Design, DevOps, C4 model, ADRs, ESLint, Prettier
